

BURROW'STM

LAMINATED COLUMN OPTIONS

We make it easy for you to succeed.

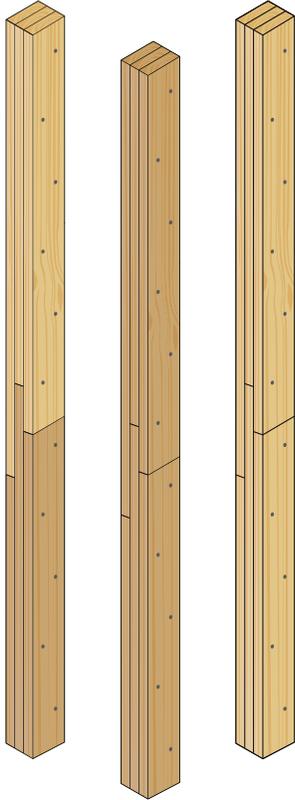

Post-frame builders can now support a greater range of project types, budgets, and goals with our expanded selection of laminated columns. We proudly announce the addition of finger-jointed Nail-Lam and Glulam columns from Richland Laminated Columns to meet the diverse demands of post-frame projects.

Stronger, straighter, and more versatile than solid posts, laminated columns can be built to larger dimensions often impossible with solid posts. CCA treatment penetration is deeper than solid posts, with bottom-treated, fully treated, and untreated options. Burrow's gives you **the advantage of choice.**

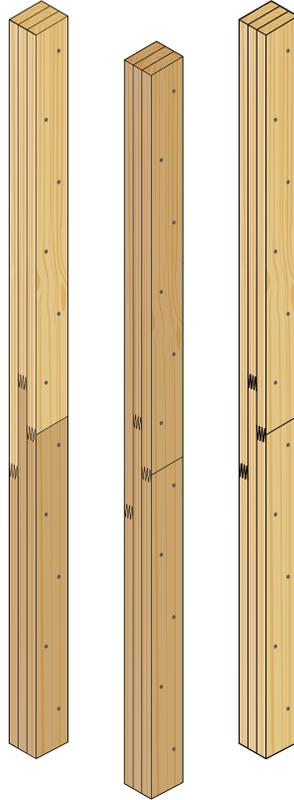

Burrow's offers more laminated column options so you can win more projects.

All laminated columns are manufactured with Southern Yellow Pine No. 1 (SYP #1) using 2×6- or 2×8-dimensional lumber and are available in 3-ply and 4-ply configurations in lengths up to 40 feet. Standard Nail-Lams are butt-jointed in a staggered configuration. Richland Nail-Lam and Glulam columns are finger-jointed for maximum structural strength.

Standard Nail-Lam

Staggered butt-joints
Planed on one side
2×6 or 2×8
3-ply and 4-ply configurations
Bottom-, Fully-, or Non-Treated

Richland Nail-Lam

Staggered finger-joints
Planed on one side
Stronger
2×6 or 2×8
3-ply and 4-ply configurations
Bottom-, Fully-, or Non-Treated

Richland Glulam

AITC-certified
Staggered finger-joints
Planed on all four sides
Stronger, straighter, lighter
2×6 or 2×8
3-ply and 4-ply configurations
Bottom-, Fully-, or Non-Treated
