# INTRODUCING RAPID FRAMING SYSTEM

## We make it easy for you to succeed.

Optimize your business with the unmatched advantages of prefabricated roof and wall panels from Burrow's. Designed for speed and efficiency, the Rapid Framing System (RFS) shortens post-frame construction timelines, reduces builder fatigue on the jobsite, and gets your projects to dry-in faster.

Ensuring quality and accuracy, RFS wall and roof panels are manufactured at Burrow's in a controlled setting. Your RFS panels arrive as pre-built sections, complete with girts and window and door openings. Staged onsite for construction efficiency, RFS panels are clearly labeled and ready-to-install, reducing on-site work and **accelerating project completion.**

# Speed and efficiency for post-frame construction

Time is a valuable resource. The Rapid Framing System (RFS) from Burrow's helps recapture precious hours in the day for you and your crew. By finishing projects faster, you can grow your business.

## A process whose time has come

Pre-built roof trusses have streamlined post-frame construction for decades, replacing labor-intensive on-site measuring, cutting and assembly with sections that install fast. That time-saving efficiency is now available with RFS pre-built wall and roof panels.

## Get to dry-in quicker

As an authorized RFS manufacturer, Burrow's supplies everything you need for speed. For owners, high-quality precision framing offers bottom-line value that includes shorter construction timelines, cleaner jobsites, less equipment requirements, accurate window and door placement, and more.

## Committed to your post-frame success

We are more than just your post-frame supplier, we're your business-growth partner. With the addition of RFS panels to your building package, Burrow's provides all the support, supplies, and accessories you need to succeed.
